

BOARD AGENDA ITEM

FEBRUARY 12, 2013

SUBJECT:

Facilities Construction Projects 1982-83 to 2011-2012

BACKGROUND INFORMATION:

The Five-Year Facility Improvement Plan is based on the greatest need at the time the plan is reconsidered annually. The age and condition of schools varied widely as the plan came into being in 1982-83, therefore, projects were considered on a school by school basis.

A perusal of the attached construction projects for the period 1982-83 to 2011-2012 shows that all areas and most schools have had one or more additions during these years.

ADMINISTRATIVE CONSIDERATION:

The Board deserves much credit for its faithfulness to the Five-Year Facility Improvement Plan and for its wisdom in keeping a long range plan in focus. We are attempting to plan construction which will accommodate the student population, address technology and security needs, and include landscaping.

RECOMMENDATIONS:

Receive Report of Facilities Construction Projects 1982-83 to 2011-2012 as information.
