

BOARD AGENDA ITEM

September 13, 2011

SUBJECT:

Construction Document Plans for the Byrd Learning Center (BLC) Food Service Operation Center Project

BACKGROUND INFORMATION:

The administration has completed the scope of school food service needs for the BLC Food Service Operation Center Project. The architectural firm of LS3P and their consultants have utilized this scope to produce the construction document plans. Due to the limited size and scope of this project, Schematic Plans and Design Development Plans were combined with this package.

ADMINISTRATIVE CONSIDERATION:

The Architects will present the design narrative, construction documents package for the BLC Food Service Operation Center Project. Final construction cost estimates and architectural plans will also be distributed for the Board's review and approval at the Board Meeting.

RECOMMENDATION:

Approve the design narrative, construction document plans, final construction cost estimate, and advertise to bid the BLC Food Service Operation Center Project as presented by LS3P.
